**Subject:** RE: SETAC Manuscript

Hi Tom,

Just got done with other assignments and will start looking at the Pellston stuff today. The email address I have for Mike Beevers:

mbeever@kermantel.net

Dave

**Subject:** SETAC Manuscript

Dave,

Attached is the most recent version of the manuscript.  
It includes all external comments.

All the comments that need further attention are highlighted in red.

Tom has gone thru the doc. and has made suggested changes/edits in several of these places, where he could. The changes he made and the area remains highlighted for our review.

I have farmed out some of the final changes to the appropriate co-author (Jim Frazier or Mace Vaughan for example)

Also attached is a table that captures each of the final edits/changes that are needed.

My thought was that by tabulating them, we can more easily track them. ... so, each entry in the attached table corresponds to highlighted text in the manuscript.

It may be good, if you go thru the table and text to review what Tom has done. If you are satisfied with the changes that Tom made, please note this in the table and text.

I will go back thru and make the changes and maintain the master version.

We can talk and determine when we are satisfied that all changes, and the doc. is ready to be sent back to SETAC.

Also,

I have begun to get permission for each of the photographs.

Do you happen to have Mike Beevers email?

Talk w. you soon,

---
